

Pass Plus Modules

In Town:

Scared of rush hour traffic? Learn how to cope with town driving by taking expert advice at some of the busiest times of day. This module begins with an introduction to the course and concentrates on

- Observation
- Judgement and awareness
- Eye contact
- Consideration for vulnerable road users
- Being cautious but not over cautious, and
- Keeping space around your car

In all weather:

The first flurry of snow or the first blanket of fog can get you into a real fix. Learn how to deal with the perils of winter before you risk denting your car. This module is a theory session, put into practice in other modules if the opportunity arises. It covers safe driving in

- Rain, sleet and snow
- Mist and fog, and
- Bright sunshine

And it looks at making sure you see and can be seen, deciding what speed to drive at and applying the rules in practice. The module also covers skidding

- The causes and how to avoid it
- Correcting slow speed skids, and
- Braking on poor surfaces

Out of Town:

Country roads can hide their own kinds of hazards. Are you ready to mix it with wildlife and farm vehicles? This module is a practical session looking at the main differences between town driving and country driving.

- Observing the road ahead
- Making progress safely
- Bends, hills and uneven roads
- Keeping a safe distance from the vehicle ahead, and
- Safe overtaking

It places special emphasis on awareness and consideration for

- Pedestrians and horse riders
- Sharp bends
- The use of your horn
- Farm entrances
- Slow moving vehicles or animals, and
- Mud on roads

At night:

How to read the road in the dark. There are some useful tips on how to deal with dusk onwards. This is also a practical session, which covers

- The importance of the correct use of headlights
- Adjusting to the dark
- Driving at dusk and dawn
- Judging speed and distance
- The correct use of lights
- Dealing with dazzle
- Looking for pedestrians, and
- Being prepared for cyclists

On dual carriageways:

You need eyes in the back of your head. Don't race, but don't be a slow coach or you will incur the wrath of other drivers. This practical module takes place on two or three lane carriageways and covers

- Joining and leaving, including right turns from dual carriageways
- Effective observation
- The use of mirrors
- Blind spots and scanning the road
- Judgement and planning
- Overtaking, and
- Lane discipline

On Motorways:

It places greater demands on the driver's skills, observation, anticipation, planning and concentration.

This will be a practical session if there is a motorway nearby. If not, it will be covered in theory but you should plan to drive on a motorway as soon as possible after the course to gain experience.

The topics covered include

- Joining and leaving a motorway
- Planning a journey in advance
- Safe speeds in different circumstances
- Effective observation and anticipation
- Signs, signals and markings
- Lane discipline
- Courtesy to other road users
- Motorway fatigue - the importance of taking a break, and
- What to do if you breakdown
